Application No. : 10/762,553 Confirmation No.: 3212  
Applicant : Jochen Von Der HARDT, et al.  
Filed : January 23, 2004  
TC/A.U. : 1746  
Examiner : Joseph PERRIN  
Docket No. : 010743.52910US  
Customer No. : 23911  
Title : Cleaning Method for Filter Testing Device, Computer  
Program Product for Implementing Said Method and  
Filter Testing Device

**INFORMATION DISCLOSURE STATEMENT  
UNDER 37 C.F.R. §§ 1.97 AND 1.98**

**Mail Stop Amendments**  
Commissioner for Patents  
P.O. Box 1450  
Alexandria, VA 22313-1450

Sir:

This supplements the Information Disclosure Statement submitted in the above-identified application on June 28, 2004.

In accordance with the duty of disclosure under 37 C.F.R. § 1.56, Applicant hereby notifies the U.S. Patent and Trademark Office of the documents which are listed on the attached Form PTO-1449 and/or listed herein and which the Examiner may deem relevant to patentability of the claims of the above-identified application.

Where available English abstracts summarizing the disclosures of the German publications are submitted herewith. The following provides a brief summary of each document:

DE 19605311 D1 discloses a method for automatically cleaning UV reactors. During such a procedure the radiation intensity of the UV radiators in

the reactor is continuously monitored and if a predefined measurement value is exceeded, a signal is output, which releases the UV reactor from the waste water treatment process by closing predetermined valves, empties the UV reactor through respective valves with ventilation at the same time and starts the cleaning process.

DE 3628656 A1 discloses an apparatus for cleaning systems which guide fluids, in particular heating systems. The cleaning is carried out using a distribution system of connections and valves with a high performance pump. The distribution system is attached to the system to be cleaned and the valves execute the switching of all operations of the cleaning process.

DE 2106223 discloses a connection arrangement for the internal cleaning of apparatuses in a cyclic process. During the process different fluids are supplied to the connection arrangement by switching the valves accordingly.

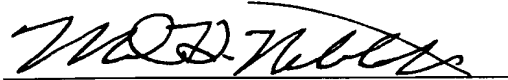

The submission of the listed documents is not intended as an admission that any such document constitutes prior art against the claims of the present application. Applicant does not waive any right to take any action that would be appropriate to antedate or otherwise remove any listed document as a competent reference against the claims of the present application.

If necessary, the paper should be considered as a petition for consideration of the Information Disclosure Statement under 37 C.F.R. § 1.97(d)(2) and that the petition fee set forth in 37 C.F.R. § 1.17(i) in accordance with 37 C.F.R.

§ 1.97(d)(3) should be charged to Deposit Account 05-1323, Attorney Docket  
No.: 010743.52910US.

April 4, 2005

Respectfully submitted,

A handwritten signature in black ink, appearing to read "J.D. Evans", written over a horizontal line.
